

# Floating Soda Can Mockup

First of all, thank you for purchasing the mockup I really hope you enjoy it.

## HOW IT WORKS

- 1- When you open any of the PSD files, you will see in the layers panel layers folder. Choose anything you need and open it.
- 2- You will see a smart layer distinguished in **red color**. This is that you need.
- 3- They contain the smart objects. Just double click on the thumbnail of this smart layer. Photoshop will open a new document in a new
- 4- Insert your image into it, hide or delete an old layer that was there before and click on «file», »save» or CTRL + S (for PC) Cmd + S (for Mac) Done! Now your image is placed in the mock-up.
