

WANT MORE WEDDING MOCKUPS AND TO SAVE 55%?

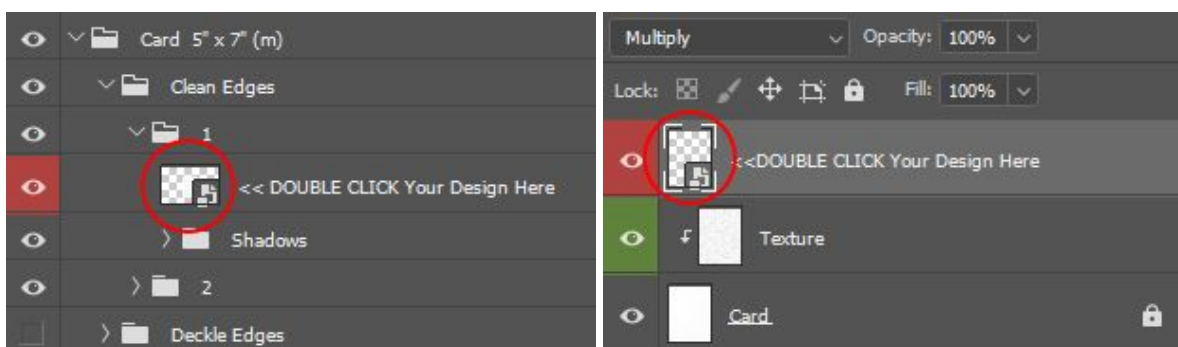

Check out the full version: <https://crmrkt.com/2QgAVy>

Hey! Thanks for downloading this product.

I'm going to tell you how to use it. It's dead simple, so you can create a presentation of your work in seconds. Let's start!

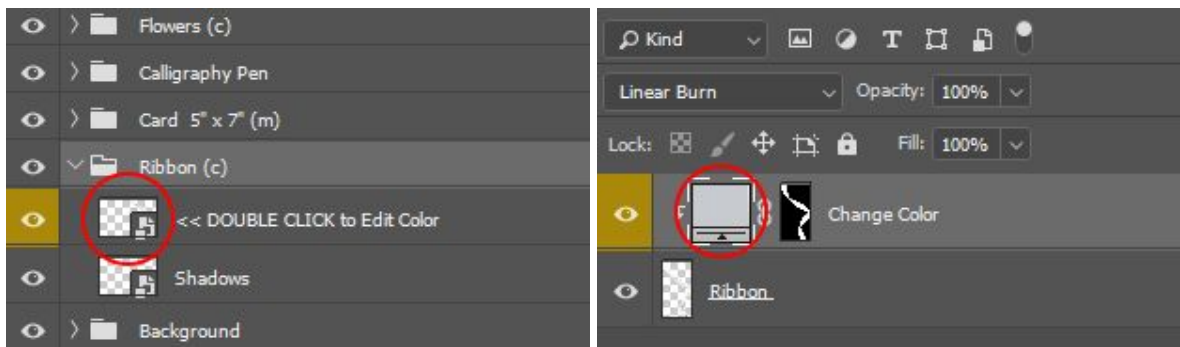

HOW TO PLACE YOUR DESIGN INTO THE MOCK-UP

To insert your design you need to edit a smart-object. Smart-objects are layers that contain big item inside, such as Photoshop or Illustrator files.

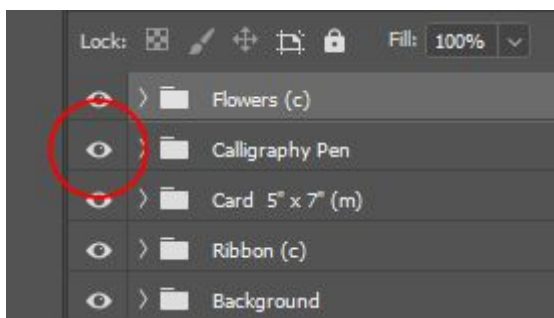

1. Open the PSD file in Photoshop.
2. Find the 'Your Design Here' layer in the Layers palette. It is marked in red and (m). If you don't see it, open the folder with the item you need.
3. Double click on the thumbnail of 'Your Design Here' layer. Photoshop will open a new document in a new window.
4. If you see another 'Your Design Here' layer in this new document again, double click on the thumbnail of 'Your Design Here' layer. Photoshop will open another document in a new window again.
5. Insert your design into and save all opened documents by clicking on File/Save or Ctrl+S (for PC) or Cmd+S (for Mac). Now your image is placed into the mock-up.

HOW TO CHANGE COLOR (C) OF OBJECTS?

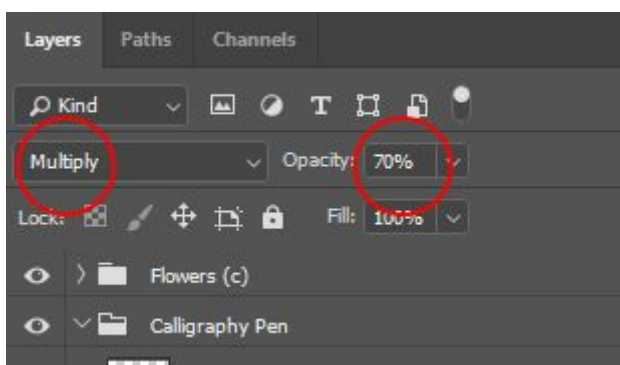

1. Find the layer named 'Double Click to Edit Color' or 'Change Color'. It's marked in yellow and (c). Open it by clicking on layers thumbnail.
2. Choose the color you need by picking the color in the Color Fill or by moving the sliders in the Hue/Saturation.

HOW TO HIDE OR SHOW OBJECTS?

1. Find the folder with object or layer you want to show/hide.
2. Click on the eye icon beside this folder. Done!

HOW TO MAKE SHADOWS DARKER OR LIGHTER?

For making your design look more natural, select the shadow layer and change its opacity and experiment with a blending mode.

TIP

These scenes have big square backgrounds, so you can easily crop these scenes with a crop tool into any size and place objects how you want.
