To edit premade scene

1.
Open photoshop.

-

2.
On the menu bar hit Edit > Preset >
Preset Manager. In the drop down box,
choose Patterns > Hit Load. Locate
pattern named Frame Materials.pat
inside Pattern Folder of the Mockup
Pack

-

3.
Open the premade scene

4.
To change frame material. Double click
on Smart Object named
Frame_Hairline (or Frame_Medium...),
locate Stroke on Layer Style box. In the
Fill Type, click on the down button next
to the material box. Choose your
preload material and hit ok.

-

5.
To edit contents of the mockups, just
double click on the smart objects, edit a
them and then hit save.

-

6.
You can also customize the background
color and move around the objects in
the scene.
